

Our clinic's name is F.I.T. Muscle & Joint Clinic and we currently have locations in Shawnee, KS, Overland Park, KS, and Lee's Summit, MO which all surround the Kansas City Metro. We are seeking a new associate doctor to join our quickly expanding company at our Lee's Summit location which just opened in January 2016.

We require our doctors to work 35-40 hours each week and be willing to market themselves weekdays and weekends. Our compensation is by far the most competitive in the area. Our appointment time for the initial visit is between 45 to 60 minutes with any visit after consisting of 30 minutes. We believe in QUALITY time with our patients and do not want our doctors or the patients to feel rushed. We believe this sets us apart from other practices and our patient retention and constant referrals shows that.

We work with a variety of patients from the elderly to high level athletes. Our practice is the fastest growing clinic in Kansas City and we wish for our doctors to stick around and grow their career here. We believe in a team mentality and we do our absolute best to make our patients experience here an enjoyable one.

Our clinic uses a functional based model with emphasis on techniques taught through MPI. The following are our requirements for employment:

- Attended at least one MPI upper and lower quarter assessment course
- Attended at least one ART seminar (Full Body certified preferred)
- Attended at least one DNS course (A-C preferred)
- Participated in a Graston course or attended one FAKTR seminar
- Familiar with concepts and theories of Dry Needling (Acupuncture credentialed would suffice)
- Attended at least one McKenzie Method seminar
- Taught in one of their school's club or was a teacher assistant for a school course

We realize it is difficult to attain all of these requirements which is why we will consider applicants who may not have had formal training in everything listed above. Part of our goal as a company is to have the best and brightest doctors working with us and to always pursue the highest level of continuing education. If an applicant has not completed all of the above at the time of employment, then we ask for all requirements to be met within the first year of employment.

If interested, please send resume to Matthew Lane at drlane@fitmjc.com or Chad Barnes at drbarnes@fitmjc.com
