Recent Palmer graduate seeking an associate position in a growing, stable practice. The location of the clinic is of secondary importance as I would like to continue building upon the skills and knowledge I have obtained at my previous position. My ideal clinic is one that incorporates rehab, manual medicine/soft tissue, and adjusting. I have experience with DRX/traction as well as IFC therapy. I am highly motivated, energetic, well-trained, and have a background in rehabilitation, exercise science, nutrition, movement screens, as well as being a Motion Palpation Institute trained adjuster. I have ambitions to open and operate a clinic of my own in the future so on the job business training and clinic management is also a priority. I am able to provide a resume and references upon request.
